

You are in demand!

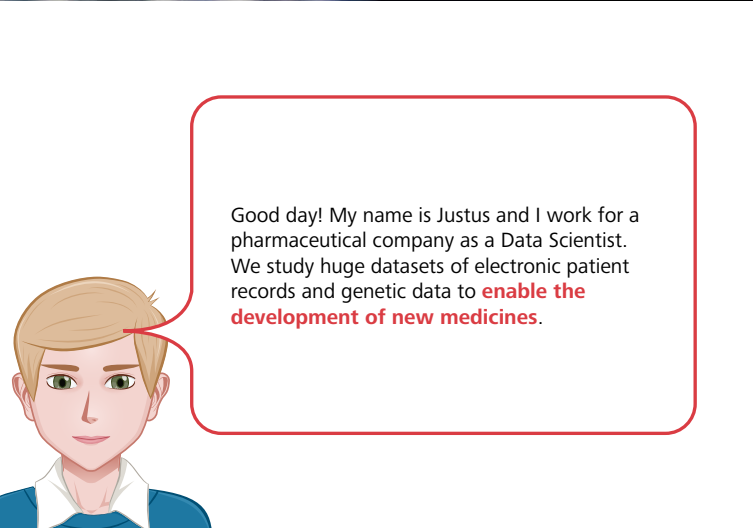

In medicine and in fashion.

Hi, I'm Leonie and I work in Silicon Valley as a Data Scientist. My team and I **analyse messages** on social networks with the aim of automatically detecting **fake news**.

Be hip!

Turn your passion into a career!

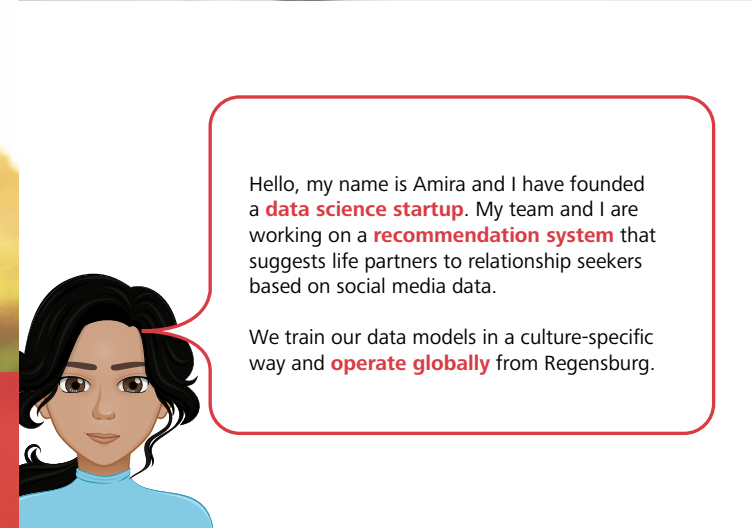

Good day! My name is Justus and I work for a pharmaceutical company as a Data Scientist. We study huge datasets of electronic patient records and genetic data to **enable the development of new medicines**.

You are in demand!

In the region and around the world.

Hello, my name is Amira and I have founded a **data science startup**. My team and I are working on a **recommendation system** that suggests life partners to relationship seekers based on social media data.

We train our data models in a culture-specific way and **operate globally** from Regensburg.

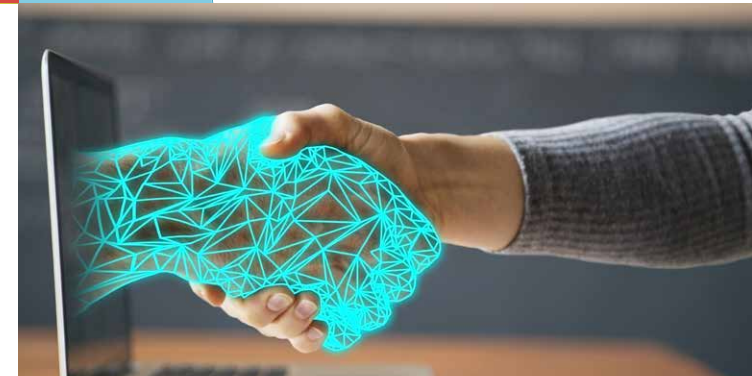

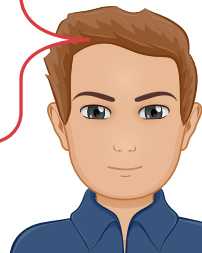

You are in demand!

As a leader and as a team member.

Hi there! I'm Max and I work as a data scientist in Neutraubling. There, I use data and **artificial intelligence** to make production lines in the beverage industry more efficient.

In the evenings, I like to hang out with my friends and explore **Regensburg**.

Be hip!

Help to shape the future!
